# Step by Step process of Aadhaar seeding with Bank Account

Aadhaar seeding to bank account is an important requirement for beneficiaries of various DBT schemes to receive DBT benefits in the account. As various Government Schemes like Scholarship schemes, Social Security schemes for construction worker etc. are going to be disbursed through Aadhaar seeded Bank account only, it is essential to seed Aadhaar numbers of beneficiaries with their Account number in Bank and NPCI Mapper. The following is the process flow of Aadhaar seeding...

## Role of the Beneficiary:

**1**

Beneficiary can check whether Aadhaar has been seeded with his/her bank Account by visiting the Aadhaar website- <https://resident.uidai.gov.in/bank-mapper>

**2**

If Aadhaar is not linked to beneficiary Bank Account and Bank has not seeded it in NPCI Mapper then, Beneficiary won't receive DBT benefit into her bank Account. Hence, Customer should visit his Bank Branch and submit duly filled consent form.

**3**

In case, a customer submits consent form for seeding his/her Aadhaar number in multiple bank accounts, the bank that has last updated the mapper will be active in NPCI mapper. NPCI mapper will route the transactions to the bank that has last seeded the Aadhaar number in the mapper

## Role of the Bank / Branch:

**1**

Verifying the completeness of the consent form, checking the documentation and authenticating the customer's signature.

**2**

After the officials are satisfied with the documentation they should carry out the following activities

- Linking the Aadhaar number to the bank account (in CBS)
- Updating NPCI mapper

**3**

After the mapper files are uploaded the response files received from NPCI have to be verified by concerned Bank

**4**

In case of failure in updating any Aadhaar number/s then necessary corrective action has to be taken and CBS also should be updated accordingly.

Note: By merely linking the Aadhaar number to the bank account the beneficiary won't receive any payment if Aadhaar based DBT is made. Hence, Aadhaar seeding process i.e. uploading Aadhaar number into the NPCI mapper must be followed by Banks if customer has given consent to do so.

**1**

Beneficiary

Customer to visit the bank branch where he / she is holding an account and submit the duly filled consent form

**2**

Bank/Branch

The bank officials after verifying the details and documents provided (as may be required) and authenticity of the customer based on the signature will accept Aadhaar seeding consent form and provide an acknowledgment to the customer.

**3**

Bank/Branch

The branch will then link the Aadhaar number to the customer's account and also in NPCI mapper.

**4**

NPCI

Once this activity is completed, Aadhaar number will reflect in NPCI mapper.

## Role of DBT Implementing Departments:

- Ensure all beneficiary Aadhaar number verified by the UIDAI & NPCI Mapper before processing any DBT payment via Aadhaar.
- Create Awareness among the beneficiaries to seed their bank account with Aadhaar to receive DBT benefits.
